The minimum number of devices that your app can access The minimum download speed that your app requires The minimum version of Android that your app can run on Correct! 4. What is the purpose of using a virtual device, or emulator, in Android Studio? To show a variety of error messages to users To experiment with app code safely To test your app on a device without having that physical device Correct! To see what your app looks like in a web browser
 The minimum download speed that your app requires The minimum version of Android that your app can run on Correct! What is the purpose of using a virtual device, or emulator, in Android Studio? To show a variety of error messages to users To experiment with app code safely To test your app on a device without having that physical device Correct! To see what your app looks like in a web browser
 The minimum version of Android that your app can run on Correct! 4. What is the purpose of using a virtual device, or emulator, in Android Studio? To show a variety of error messages to users To experiment with app code safely To test your app on a device without having that physical device Correct! To see what your app looks like in a web browser
4. What is the purpose of using a virtual device, or emulator, in Android Studio? To show a variety of error messages to users To experiment with app code safely To test your app on a device without having that physical device To see what your app looks like in a web browser
 To show a variety of error messages to users To experiment with app code safely To test your app on a device without having that physical device ✓ Correct! To see what your app looks like in a web browser
 To show a variety of error messages to users To experiment with app code safely To test your app on a device without having that physical device ✓ Correct! To see what your app looks like in a web browser
To experiment with app code safely To test your app on a device without having that physical device Correct! To see what your app looks like in a web browser
To test your app on a device without having that physical device Corrects To see what your app looks like in a web browser
To see what your app looks like in a web browser
5. In Android Studio, what is a project template good for? Choose as many answers as you see fit.
☐ It causes Android Studio to download files faster.
☑ It makes getting started on building a new app faster.
☑ It provides a structure that follows best practices.
It is the only way to build apps that can be previewed in Android Studio.
✓ It makes building a new app less error-prone by pre-populating the project with some app
code.
6. How do you create a new project in Android Studio?
A. Log out of Android Studio, and navigate to your project folder to find instructions.
B. If you have a project already open, select File > New > New Project from the Android Studio menu.
C. In the "Welcome to Android Studio" window, click "Start a new Android Studio project."
D. Create a new file on your computer, and title it "New Android Studio Project."
Both B and C are ways to create a new project in Android Studio.

Results

You scored 6 out of 6. Congratulations! You have passed this quiz.
